

ROW CROP INSECT CONTROL

The dual active ingredients in Hero[®] insecticide provide complementary actions for control of many row crop i.e., cotton, corn, sweet corn, soybeans and peanuts and specialty crop pests. The unique combination of Hero insecticide's proven active ingredients provides superior knockdown and longer lasting residual control of stink bugs and other insect pests in labeled crops.

APPLICATION USE GUIDELINES

- Application Timing:** When pest threshold is reached or when tank mixed with Topguard[®] EQ fungicide to control a complex of pests typically present during the late season reproductive stages of soybeans.
- Recommended Use Rates¹:** 5.0-10.3 fl. oz./A
- REI:** 12 hours
- Spray Volume:** Refer to labeled crop for specific use instructions. Coverage is critical for optimum efficacy.

¹Refer to Hero label for specific crop by pest use rates. The maximum use rate for some pests in the crops listed below is 6.1 fl. oz./A Hero insecticide.

Crop	Maximum Application Rate (fl. oz./A)	Maximum Seasonal Use Amount (fl. oz./A)	Maximum Seasonal Use Amount (lb. ai/A)	Preharvest Interval (days)
Corn	10.3	41.2	0.40	30 – grain, stover & grazing; 60 – forage
Sweet Corn	10.3	27.39	0.266	3
Cotton	10.3	46.35	0.45	14
Soybeans	10.3	41.2	0.40	21
Peanuts	10.3	41.2	0.40	14
