**Product Overview:**

Unleash the powerful endurance of Stallion® Brand insecticide for effective corn and soybean protection. The dual-action formulation knocks out aphids, cutworms, webworms and over 25 other insects with long-lasting residual control.

Stallion Brand insecticide doesn’t quit when the job gets tough. The effective chemistry causes faster knockdown and keeps on working long after application. The formulation can be applied by ground or by air, whichever works best for your operation. It can also be tank mixed with fungicides, postemergent herbicides and foliar fertilizers for increased efficiency.

When your crops need support against tough pests, the expansive power of Stallion Brand insecticide provides the protection they need.
