

# Authority<sup>®</sup> MTZ DF herbicide

## MANAGE EARLY SPRING WEEDS WITH A FALL APPLICATION OF AUTHORITY<sup>®</sup> MTZ DF HERBICIDE.

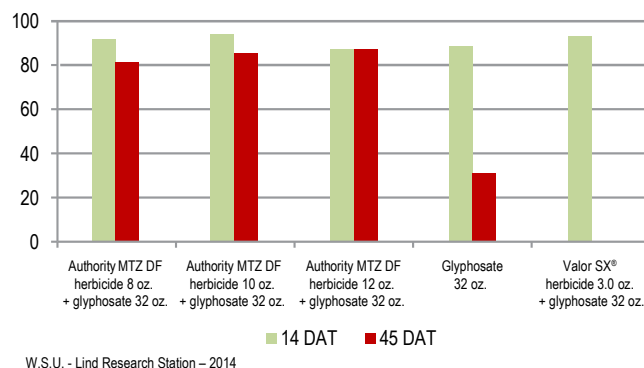

### Intended corn or spring fallow acres are top candidates for this powerful fall burndown with residual action.

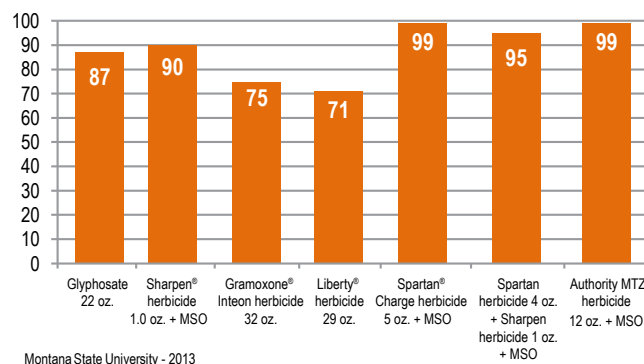

Keep early weeds from getting ahead and get a jump-start on spring weed control with a fall application of Authority<sup>®</sup> MTZ DF herbicide.

- Authority MTZ DF herbicide offers outstanding residual control of kochia and Russian thistle, plus excellent residual control of early-season pigweed and nightshade.
- Authority MTZ at 10-14 oz. applied in the fall with a burndown herbicide is effective in keeping kochia and other early weeds from establishing in the spring.
- Authority MTZ DF herbicide 10-12 oz. + atrazine 1 lb. a.i./A in the fall, followed by Anthem<sup>®</sup> Maxx herbicide + atrazine or Anthem Maxx herbicide + Balance<sup>®</sup> Flexx herbicide as a pre-emerge, or Solstice<sup>®</sup> herbicide + atrazine as a post makes an excellent dryland corn program.
- For improved burndown of emerged weeds, tank mix with Aim<sup>®</sup> EC herbicide, 2, 4-D, dicamba, paraquat, glufosinate or glyphosate. Add an MSO or COC at 1 percent v/v to burndown sprays and use 15 GPA for good coverage.
- Apply October through November when soil temperatures have dropped to 55 degrees or below at a 4-inch soil depth.

#### Percent Russian Thistle Control

#### Kochia Burndown Percent Kochia Control 30 DAT

# SPRING FALLOW

## For spring/summer fallow, keep them cleaner from the start with Authority MTZ DF herbicide.

Spring fallow can be a real challenge to keep clean, so start this fall with an application of Authority MTZ DF herbicide as a burndown and to suppress early weed flushes next spring. With Authority MTZ DF herbicide, plant either corn or wheat after four months. Keep fallow acres cleaner from the start with less tillage.

- Authority MTZ DF herbicide offers outstanding residual control of kochia, Russian thistle, lambsquarters and early suppression of pigweeds to provide a cleaner start.
- Fall application prevents kochia and other problem weeds from establishing in spring, helping conserve valuable soil moisture and reducing the need for multiple post sprays during the spring and summer.
- Authority MTZ DF herbicide can be applied in the spring as well for summer fallow or soybean weed control. Soybeans can be planted anytime. Corn and wheat may be planted four months after application.
