Panoflex® Herbicide
with TotalSol® soluble granules

Enhancing winter annual control in your glyphosate or post harvest fall burndown program.

Panoflex® herbicide applied for fall burndown delivers:

• An optimal ratio of two active ingredients to maximize the burndown performance of your glyphosate program.
• Flexibility to plant corn or soybeans next spring.
• Additional burndown on glyphosate-tolerant tough winter annuals, dandelions, henbit, marestail* and chickweed.
• Easy to handle dry-flowable formulation.
• 20 oz. bottles; 60 acres at 0.33 oz./A; 33 acres at 0.6 oz./A.

RATE RECOMMENDATION
Panoflex herbicide 0.6 oz./A in the fall if used alone or with glyphosate

• Adjuvants are recommended. If applied in a tank-mix combination with glyphosate that contains a built-in adjuvant system, no additional surfactant is needed.
• For additional control of grasses and broadleaves, Panoflex herbicide may be tank mixed with other burndown herbicides.

Application information

• Apply by ground or by air.
• Timing — May be applied as a burndown treatment to emerged weeds preplant after fall harvest through early spring up to planting, whenever the ground is not frozen.
• Follow FMC recommended best mixing practices for burndown applications.

* 2,4-D LVE addition required.
