Best-in-class performance on key peanut diseases while preserving yield potential.

Powered by a novel premix of active ingredients from FMC, new Lucento® fungicide provides an exclusive combination of benefits for smart disease protection and high yielding performance against the toughest diseases in peanuts. Lucento fungicide’s unique mobility throughout the plant defends against and controls threatening diseases like white mold and leaf spot, resulting in greener fields and higher yields. Lucento fungicide can be used to reduce the dependence on other important fungicides, like strobilurins, as part of a disease resistance management plan.

Product Information:

Active ingredients: Bixafen (succinate dehydrogenase inhibitors, FRAC Group 7), flutriafol (demethylation inhibitors, FRAC Group 3)

Diseases Controlled:

- White Mold
- Leaf Spot

Benefits of Lucento Fungicide:

- Only premix of proven SDHI, bixafen, and FMC-patented flutriafol active ingredients.
- Preventive and curative control of leaf spot and white mold.
- Alternative mode of action reduces dependence on strobilurins, helping manage resistance risk.
