

TOPGUARD EQ
FUNGICIDE

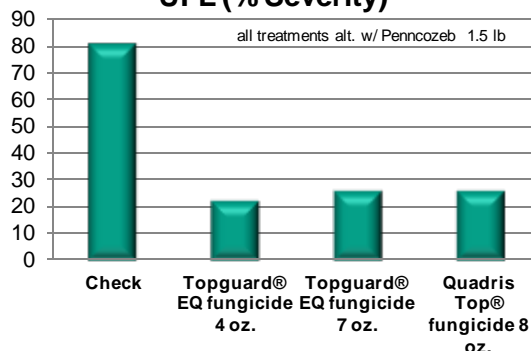

BROAD SPECTRUM DISEASE CONTROL IN FRUITING VEGETABLES

UNIQUE PROPRIETARY FUNGICIDE COMBINING FMC'S PATENTED FLUTRIAFOL FUNGICIDE WITH A STROBILURIN. PROVIDES BROAD-SPECTRUM DISEASE CONTROL INCLUDING ANTHRACNOSE, MILDEWS, BLIGHTS, AND TARGET SPOT

Tomato Target Spot Disease Intensity, G. Vallad, UFL (AUDPC)

Tomato Target Spot Control, G. Vallad, UFL (% Severity)

Product Attributes	Benefits
Superior Activity	Combines benefits of highly systemic and long lasting Group 3 fungicide; Flutriafol, plus top of class Group 11 strobilurin fungicide; Azoxystrobin.
Systemic Activity	Topguard EQ fungicide rapidly moves through the xylem to new leaves, keeping fungal diseases out of the canopy, protecting yields and quality.
Resistance Management	Multiple modes of action support strobilurin resistance management programs.
