

DECLARE[®] Insecticide — Use it on row and specialty crops for control of a wide range of insect pests

DECLARE[®] insecticide controls numerous insect pests such as aphids, beetles, thrips and worms. It is labeled for use on a variety of crops including alfalfa, cole crops, corn, cotton, cucurbits, fruiting vegetables, pome fruit, stone fruit, tree nuts, rice, lettuce, onions, garlic, tomatoes, legumes and more.

The active ingredient in DECLARE insecticide is gamma-cyhalothrin, which is the latest generation pyrethroid. In addition, DECLARE insecticide can be tank-mixed with other insecticides for greater crop protection. Effective tank-mixes include DECLARE insecticide and FYFANON[®] ULV AG insecticide for late season plant bug control in cotton, and DECLARE insecticide with NUFOS[®] 4E insecticide for knockdown and residual control of insect pests on soybeans.

DECLARE insecticide also has an exceptionally low use rate when compared to other pyrethroids, while providing an extended period of control of target pests.

Pyrethroid Rate Comparison* (fl oz/Acre)			
Product	Active Ingredient	Low Rate	High Rate
Asana [®] XL insecticide	esfenvalerate	2.9	19.2
Baythroid [®] XL insecticide	beta-cypermethrin	0.8	3.2
Decis [®] insecticide	deltamethrin	0.8	2.8
DECLARE insecticide	gamma-cyhalothrin	0.51	2.05
Karate [®] insecticide	lambda-cyhalothrin	1.92	5.12
Silencer [®] insecticide	lambda-cyhalothrin	1.92	5.12
Warrior [®] II insecticide	lambda-cyhalothrin	0.96	2.56

*Application rates vary by crop.

For Use On: Alfalfa, canola, cole crops, corn, cotton, fruiting vegetables, legumes, lettuce, onion, peanut, pome fruits, rice, sorghum (grain), soybeans, stone fruits, sugarcane, sunflower, tobacco, tree nuts, wheat and triticale

Formulation: CS (capsulated suspension)

Packaging: 1 gal container, 4 per case

Active Ingredient: Gamma-cyhalothrin

Mode of Action: Sodium channel modulator

Use Rates: 0.51–2.05 fl oz. per acre depending on crop

Signal Word: Caution

Insects Controlled*

- Aphids
- Beetles
- Thrips
- Worms

*See label for complete listing of controlled insects.

Application Information

Depending on your crop, **DECLARE® insecticide** can be applied at planting or as required by scouting and then at various intervals thereafter. Timing and frequency of applications should be based upon insect populations reaching locally determined thresholds. See the product label for specific directions on rates, target pests and crops. **DECLARE insecticide** is a restricted use pesticide due to toxicity to fish and aquatic organisms. Please review the label to understand the required buffer zones needed between field edge and down gradient aquatic habitats including, but not limited to, lakes, rivers, ponds, streams, etc.

Consult label for specific direction on spray additives, re-entry interval (REI) and personal protective equipment (PPE).

For more information about **DECLARE insecticide**, contact your local crop protection dealer, visit **FMCcrop.com** or call **888-59-FMC-AG**.

DECLARE insecticide and NUFOS 4E insecticide are restricted use pesticides.
