

# FYFANON® ULV AG

INSECTICIDE

## FYFANON® ULV AG Insecticide – Proven control of insect pests including beetles, flies and grasshoppers

FYFANON® ULV AG Insecticide controls key insect pests in a variety of crops including corn, cotton, and cereals. FYFANON ULV AG Insecticide is a proven insecticide that provides both knock-down and residual control of piercing, sucking and chewing insects such as aphids, beetles, flies, grasshoppers, mites, thrips, and even adult corn rootworm.

Its ultra-low volume formulation may be applied undiluted as a ground spray or by air when using equipment designed for ultra-low volume application. FYFANON ULV AG Insecticide is flexible enough to be used as part of a season long integrated pest management program or as a component to manage pesticide resistance.

**For Use On:** Alfalfa, beans, blueberries, cherries, corn (field, sweet and pop), cotton, rice, sorghum and cereals

*(See label for complete list of crops.)*

**Formulation:** ULV (ultra-low volume concentrate)

**Packaging:** 2.5 gal. container, 55 gal. drum, 260 gal. tote, bulk

- Thrips

*\*See label for complete listing of controlled pests.*

## Application Timing

**FYFANON ULV AG Insecticide** can also be applied on rangeland, pasture and other uncultivated non-agricultural use areas, such as wasteland and roadsides to control biting gnats/midges, screwworms and numerous flies. Please see product label for details and also note the label for precautions and restrictions for application of **FYFANON ULV AG Insecticide** to cotton to control boll weevil.

Consult label for specific direction on spray additives, re-entry interval (REI) and personal protective equipment (PPE).
