

NIMBLE[®] Herbicide—Selective postemergent control of broadleaf weeds in cereals

NIMBLE[®] Herbicide controls more than 40 broadleaf weeds in wheat, barley, oats, triticale and fallow. NIMBLE Herbicide also provides broadspectrum control of tough weeds including curly dock, field pennycress, groundsel and lambsquarters.

NIMBLE Herbicide has a lower use rate than Harmony[®] Extra herbicide and can be tank-mixed with other suitable herbicides to control additional weeds. NIMBLE Herbicide may also be used for preplant burndown programs.

For Use On: Wheat (including durum), barley, oats, triticale and fallow

Formulation: WDG (water dispersible granule)

Packaging: 20 oz. bottle, 8 per case

Mode of Action: ALS Inhibitor

Use Rates: 0.3 oz. – 0.9 oz. per acre depending on target weed

Signal Word: Caution

Weeds Controlled*

- Annual sowthistle
- Common groundsel
- Curly dock
- Field pennycress
- Lambsquarters
- Wild chamomile

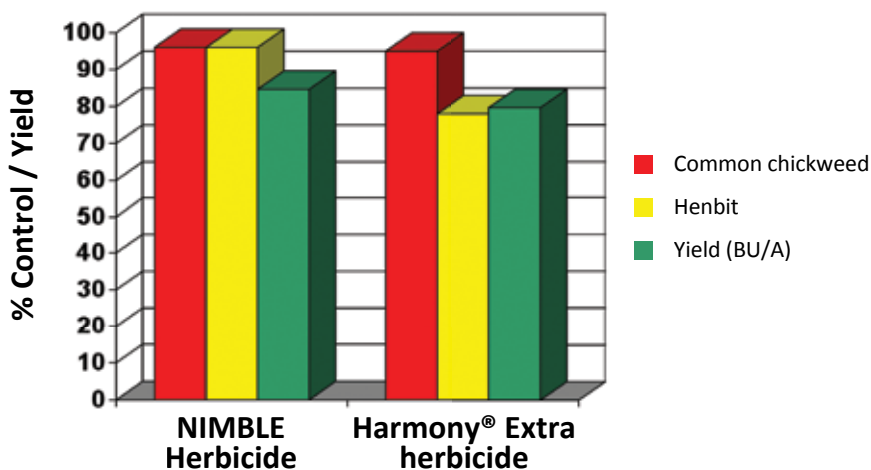

**See label for complete listing and additional weeds controlled with tank-mix partners.*

Application Information

For best results, apply **NIMBLE® Herbicide** to young, actively growing weeds. The use rate will depend on weed spectrum and size of weed at time of application. Please refer to label for specific directions related to target weed and use sites. The degree and duration of control of weeds may depend on the following factors:

- Weed spectrum and infestation intensity
- Weed size at application
- Environmental condition at and following treatment
