Heavy Western Bean Cutworm (WBC) trap catches have been reported in Indiana and Ohio. The map at right shows the extent of trap catches in throughout Ohio since July 7th, 2017. Scouting for egg masses started 2 weeks ago throughout Indiana, Michigan, and Ohio. Hero Insecticide and Mustang Maxx insecticides recommended and applied.

Where to Scout First?

Prolonged corn planting in 2017 begs the question where to scout first?
Listed below are some criterion for a faster assessment of WBC in your area.

1. Start scouting in localities where trap counts are highest
2. Due to Cry1F failures in 2016 and the 2017 prolonged planting season, pre-tassel and tasseling corn needs to be scouted
3. Check Non-Bt, refuge acres
4. **CORN THRESHOLD** To spray is 5% corn plants with egg masses
5. **DRY BEAN THRESHOLD** Treat if traps catch 50 or more WBC moths check local dry bean fields for pod feeding damage and treat. If 150 WBC moths are caught, a Mustang Maxx insecticide 4 oz./A or Hero Insecticide 4 to 6.4 oz./A controlling WBC reduces ear rot and mold and protects corn yield and quality.

**HERO® INSECTICIDE & MUSTANG® MAXX INSECTICIDE ARE TOP CHOICES FOR WESTERN BEAN CUTWORM (WBC) CONTROL**

**STAY AHEAD OF WESTERN BEAN CUTWORM (WBC) DAMAGING CORN AND AFLATOXIN INFECTION BY APPLYING HERO INSECTICIDE FOR KNOCKDOWN AND RESIDUAL WBC CONTROL TO INCREASE YIELDS**

**Parts Per Billion**

- 300 ppb - Max limit for finishing beef cattle.
- 200 ppb - Max limit for finishing swine (over 100 lbs).
- 100 ppb - Max limit for breeding livestock, mature poultry.

**Aflatoxin Levels in Corn. SDSU - 2007**

- 300 ppb - Max limit for finishing beef cattle.
- 200 ppb - Max limit for finishing swine (over 100 lbs).
- 100 ppb - Max limit for breeding livestock, mature poultry.

HERO® Insecticide 6 oz./A provided best protection against Western Bean Cutworm and best Aflatoxin prevention as well as yield protection.
