## Post-emergence Corn Herbicide Options

Anthem<sup>®</sup> MAXX herbicide and Solstice<sup>®</sup> herbicides are powerful options for post-emergence corn weed control. FMC corn herbicides provide application flexibility in addition to excellent foliar and residual activity on multiple tough weed species, reducing weed competition and preserving crop yields. Research from the University of Missouri has demonstrated a 14 bu/A reduction when weed removal occurred at 4" vs 2" weed heights (Figure 1). If you did not start clean or have weeds emerging, *now* is the time to get into the field and apply Anthem MAXX herbicide and Solstice herbicide.

In 2017, FMC is offering the **FREEDOM PASS HERBICIDE ASSURANCE** program promoting Anthem MAXX herbicide and Solstice herbicide tank-mixtures and assuring performance. Talk to your local FMC marketing manager to obtain details.

Adapted from Donald Null, University of Missouri

Solstice herbicide 2.5 oz + Atrazine 16 oz + Glyphosate 1 lb ae

Glyphosate-Resistant Waterhemp 5 DAT

Solstice herbicide 2.5 oz. + Anthem MAXX herbicide 2 oz. + Atrazine 0.5 lb. + HSOC 1 quart/100 + AMS 17 lb/100 gal + RUP - 32 oz + AMS.

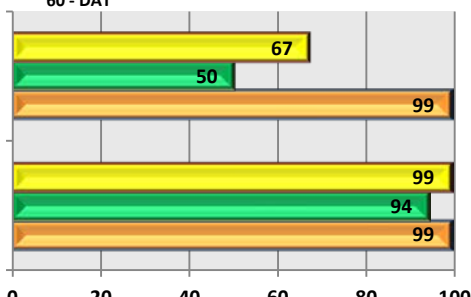

Mesotrione 3 oz/a + Glyphosate 0.75 lb ae | Solstice<sup>®</sup> herbicide 3 oz/a + Glyphosate 0.75 lb ae

One Pass Post Anthem MAXX Herbicide & Solstice Herbicide Corn Programs 60 - DAT

3.15 oz. Solstice herbicide + 1 pt. atrazine

2.5 oz. Solstice herbicide + 2 oz. Anthem MAXX herbicide

All treatments included 32 oz. Roundup PowerMax herbicide. Source: UNL S Central Ag Lab, Clay Center, NE 2014.
