**ZEUS<sup>®</sup> XC HERBICIDE, ZEUS<sup>®</sup> PRIME XC HERBICIDE, AND SOLIDA<sup>®</sup> HERBICIDE FOR PRE-EMERGENCE CONTROL OF KEY BROADLEAF WEEDS AND YELLOW NUTSEGE IN GRAPES, BERRIES AND NOW APPLES\***

\*SEE SUPPLEMENTAL LABEL FOR APPLE USE INSTRUCTIONS

## Maximizing Orchard and Vineyard Weed Control with Zeus XC herbicide, Zeus Prime XC herbicide and Solida herbicide

Herbicide resistant mare's tail and kochia, along with yellow nutsedge have made weed control in grape and fruit blocks more difficult, if not impossible. Zeus XC herbicide and Zeus Prime XC herbicide can provide residual control of tough weeds, and when tank mixed with Solida herbicide can provide contact and residual control in an overlapping weed control program.

### Zeus XC herbicide & Zeus Prime XC herbicide - Benefits

- Excellent crop safety with tank mix flexibility
- Excellent control of difficult to control weeds like pigweed, kochia, Russian thistle, mare's tail, mallow, and nutsedge
- Great application flexibility: Fall and spring dormant applications as well as in season use with a shielded sprayer
- Short pre-harvest interval. 3 - 14 day PHI (See label for crop specific PHI)

### Solida herbicide - Benefits

- Broad crop labeling (grapes, berries, and pome fruits)
- Preemergence and Post emergence activity
- Excellent broadleaf and grass control
- Proven crop tolerance on young trees (one growing season) and long residual control
- Additional mode of action to minimize resistance to glyphosate and glufosinate
- Limited application restrictions during dormant and non-dormant periods
- Excellent tank mix partner with Zeus XC herbicide and Zeus XC Prime herbicide
