

plus

Bringing Maximum Yield Protection for Soybeans

- ✓ Plant Health Benefits:
 - Disease control
 - Improved growth efficiency
 - Increased tolerance to stress
- ✓ Key component of an Asian soybean rust management program
- ✓ Preventative applications most effective
- ✓ Fast-acting and extremely rain fast (1 hr)
- ✓ Application timing: R1 to R3 (flower initiation to beginning pod)

Primary and Secondary

Diseases Labeled:

- Asian soybean rust* - Cercospora blight & leaf spot
- Alternaria leaf spot - Frogeye leaf spot
- Anthracnose - Pod & stem blight
- Brown Spot - Rhizoctonia aerial blight

Application rate(s) + Adjuvant

- ✓ 6 oz/ac
- ✓ 9 oz/ac under severe disease pressure
- ✓ Application information:
 - Ground - 15+ GPA minimum
 - Aerial - 5 GPA minimum
 - Chemigation - up to 1/2 inch per acre
- ✓ Use of an adjuvant is recommended

* Refer to the Headline® label for specific recommendations for Asian soybean rust.

- ✓ Patented biphenyl + cyano pyrethroid
- ✓ Fast knockdown + long residual
- ✓ Very broad spectrum
- ✓ Excellent mixing properties
 - Compatible in hard water, temperature and pH extremes
 - Compatible with fungicides, herbicides or foliar fertilizers
- ✓ Short re-entry interval (12 hours) and pre harvest interval (21 days)

Multi-Pest Spectrum

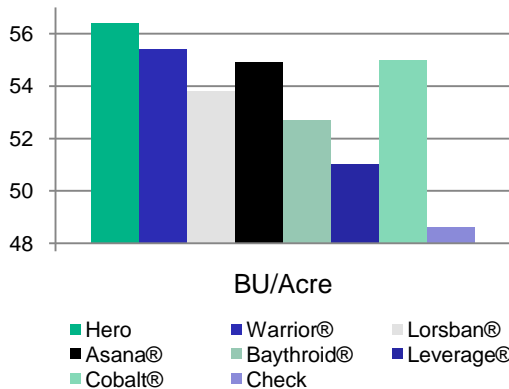

- Soybean Aphid
- Stinkbugs
- Podworm
- Bean Leaf Beetle
- many others.....
- Grasshoppers
- Rootworm adults
- Cloverworm
- Thistle Caterpillar
- Mites

Application rate: **5.12 oz/ac**

Hero® Yield 2006-2008 Midwest 14 trial average

(all products not compared in every trial - Hero, Lorsban, Warrior, Check were in all trials)
