Best-in-class protection on key sugar beet diseases while preserving yield potential.

Powered by a novel premix of active ingredients from FMC, new Lucento® fungicide provides an exclusive combination of benefits for smart disease protection and high yielding performance against the toughest diseases in sugar beets. Under heavy pressure, field studies demonstrated that Lucento fungicide provided excellent control of cercospora leaf spot. Lucento fungicide should always be used in combination with another broad-spectrum fungicide as part of a resistance management plan.

QUICK FACTS

- Only premix of a proven SDHI, bixafen, and FMC-patented flutriafol active ingredients.
- Highly systemic fungicide with preventative control of cercospora leaf spot and powdery mildew.
- Both acropetal and translaminar movement improve coverage and disease control.
- Dual modes of action reduce risk of resistance.
Application Guidelines

- Maximum rate: 5.5 fl. oz./A
- Retreatment interval: 21 days
- Method: Ground, air, chemigation
- Preharvest interval (PHI): 21 days
- Maximum applications: Two per crop year
- Restricted entry interval (REI): 12 hours

Product Information

Active ingredients: Bixafen (succinate dehydrogenase inhibitors, FRAC Group 7), flutriafol (demethylation inhibitors, FRAC Group 3)

Disease | Application
--- | ---
Cercospora Leaf Spot | Apply Lucento fungicide tank mixed with another broad-spectrum fungicide when disease is detected in the region or conditions are favorable for disease development. Use a rotation program of different broad-spectrum fungicides for subsequent applications. Do not use Lucento fungicide back to back or more than twice in a seasonal spray program for cercospora leaf spot.
