Experience the pyrethroid difference with healthier crops and more dollars per acre

Mustang® Maxx insecticide brings the pyrethroid difference to your fields, effectively controlling more than 100 insect pests on over 200 crops, including five key vegetable groups. Its broad versatility provides something for everyone.

The enhanced pyrethroid chemistry of Mustang Maxx insecticide works on contact and ingestion, and may be applied before, during or after planting. It also makes a great tank mix partner with other products.

For healthier crops and better dollar-per-acre return on your investment, choose Mustang Maxx insecticide.

**Quick Facts**

- Enhanced pyrethroid chemistry works on contact
- For at-plant, pre- or post-emergence application
- Proven, broad-spectrum insecticide for higher yields
- Controls more than 100 pests on 200 crops, including five key vegetable groups
- Controls widest range of insects; few insecticides can make the same claim
- May be applied by ground, air and chemigation
