ANTHEM® FLEX HERBICIDE
RESIDUAL CONTROL OF GRASSES AND BROADLEAF WEEDS

INFORMATION

- Active Ingredients: pyroxasulfone, carfentrazone-ethyl
- Formulation: 4 SE (suspoemulsion)
- Package size: 1-gallon container
- Signal Word: CAUTION
- REI: 12 hours

ANTHEM® FLEX HERBICIDE BENEFITS

- Residual control of Palmer amaranth, waterhemp, Florida pusley, prickly sida (teaweed) and annual grasses such fall panicum, foxtail species, goosegrass, barnyardgrass and crabgrass species.
- Excellent postemergence control of key broadleaf weeds including morningglory species, velvetleaf and lambsquarters.
- Excellent crop safety when used in sequential postemergence weed applications at-cracking and 20-40 days after planting.
- Flexible use rates: 2.7 – 4.0 fl. oz./A.
- Excellent resistance management tool.
- Tank-mix compatible with other labeled herbicides, insecticides and foliar nutrients.
- Flexible rotational intervals for corn, wheat, cotton, peanuts and grain sorghum.

PEANUT APPLICATION REQUIREMENTS

- Peanut seed must be planted at least 1.0 inch deep.
- Anthem Flex herbicide must be activated (0.5 inch of rain or irrigation required) to provide residual control.
- Postemergence applications may be made from at-cracking to the first leaf stage through beginning pod development.
- Time postemergence applications to labeled weeds no larger than 4” in height.
- Anthem Flex herbicide may be tank mixed with other labeled and commonly used postemergence peanut herbicides for broader spectrum and improved weed control.
- The use of an NIS adjuvant at 0.25% v/v is recommended for consistent postemergence weed control.

PREHARVEST INTERVAL

- Do not apply to peanuts once they begin pod development.

TANK-MIX PARTNERS: EARLY POSTEMERGENCE APPLICATIONS

- Anthem Flex herbicide can be applied with other peanut postemergence herbicides such as 2,4-DB, Cadre® herbicide, paraquat, Storm® herbicide and Cobra® herbicide for improved weed control and broader spectrum.
- Coverage is essential for effective postemergence weed control. Minimum 10 GPA by ground, 15 GPA recommended.

PEANUT SPECIFIC USE RESTRICTIONS

- Do not apply more than 4 fl. oz. per acre in a single application.
- Do not apply more than three times per year.
- Do not apply more than 9.12 fl. oz. per acre per year.
- The minimum retreatment interval is 14 days.
