

Topguard® Fungicide Specialty Crops

TOPGUARD®

FUNGICIDE SPECIALTY CROPS

Highly Systemic for Maximum Plant Protection

As a rotational partner against powdery mildew during rapid vines growth, you would be hard pressed to make a better Group 3 fungicide selection than Topguard® Fungicide Specialty Crops. Topguard Fungicide Specialty Crops protects both crop quality and yields.

Topguard Fungicide Specialty Crops is the most systemic fungicide in its class, moving throughout the plant faster than other triazoles and offering full protection where other leading fungicides fail. The quick penetration and rapid movement to sites of established infection provide fast curative activity on powdery mildew. As the most residual of all triazoles, Topguard Fungicide Specialty Crops provides longer lasting protection to prevent further infections.

Topguard Fungicide Specialty Crops is rainfast within two hours and can be tank mixed with most fungicides, insecticides and surfactants for increased crop protection. Topguard Fungicide Specialty Crops is an excellent choice as a foundational fungicide.

Application Guidelines

Maximum Rate per Acre: 14 fl. oz.

Retreatment Interval: 14 days

May be applied through drip irrigation.

Pre-Harvest Interval (PHI): 7 days

Maximum Applications per year: 4

Restricted –entry interval (REI): 12 hrs

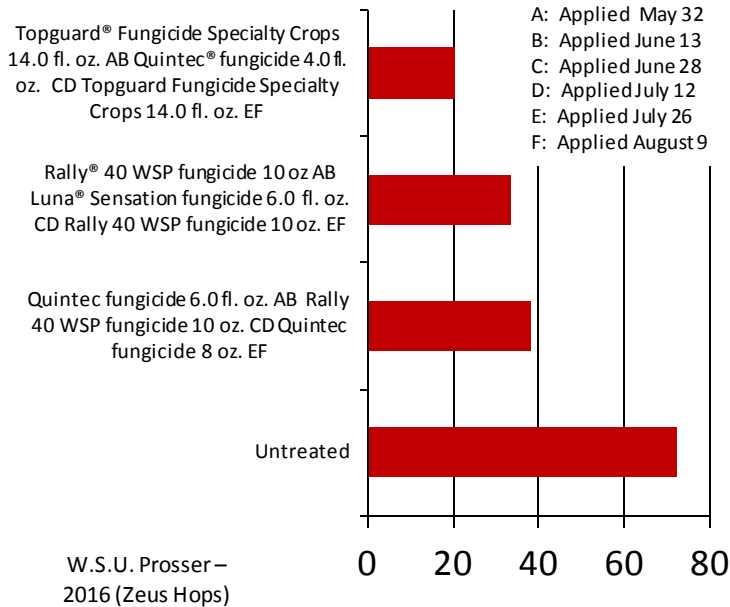

Untreated Check

Topguard Fungicide
Specialty Crops 14 fl. oz. –
alternated with Quintec®
fungicide 8 fl. oz.

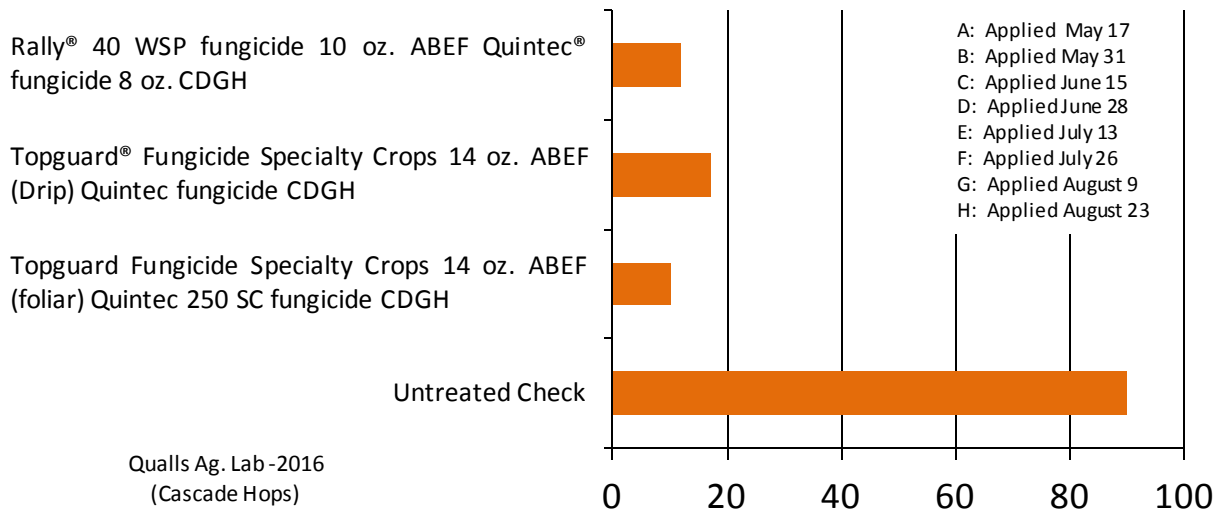

Percent Infected Cones
