

BROAD SPECTRUM DISEASE CONTROL IN CUCURBITS

UNIQUE PROPRIETARY FUNGICIDE COMBINING A STROBILURIN WITH FMC'S PATENTED FLUTRIAFOL FUNGICIDE. PROVIDES BROAD-SPECTRUM DISEASE CONTROL INCLUDING ANTHRACNOSE, MILDEWS, AND BLIGHTS

Watermelon Gummy Stem Blight Disease Intensity, M. Paret, UFL (AUDPC)

Cucumber Downy Mildew Disease Intensity, G. Vallad, UFL (AUDPC)

Product Attributes	Benefits
Superior Activity	Combines benefits of highly systemic and long lasting Group 3 fungicide; Flutriafol plus top of class Group 11 strobilurin fungicide; Azoxystrobin.
Systemic Activity	Topguard EQ fungicide rapidly moves through the xylem to new leaves, keeping fungal diseases out of the canopy, protecting yields and quality.
Resistance Management	Multiple modes of action support strobilurin resistance management programs.
